ANUSRII E

AI/ML Engineer | Software Developer

anusriie@gmail.com | +91-8148301409 | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Final-year B.Tech (Honours) student in Artificial Intelligence & Data Science with three internships and five deployed projects in Machine Learning, NLP, Computer Vision and Generative AI. Skilled in Python, SQL and PyTorch, with hands-on experience building and deploying RAG-based and full-stack AI applications using FastAPI, React and Streamlit. Seeking an AI/ML or software engineering role to build production-ready solutions.

TECHNICAL SKILLS

Languages: Python, Java, Dart, SQL, JavaScript
AI/ML & Generative AI: PyTorch, TensorFlow, Scikit-learn, YOLOv8, NLP, Computer Vision, RAG, LLMs, Semantic Search, Text Embeddings, Data Augmentation, Time-Series Forecasting, Anomaly Detection, Pandas, NumPy
Web & Backend: FastAPI, Flask, React.js, Flutter, Streamlit, REST APIs, HTML5, CSS3
Databases: PostgreSQL, MySQL, MongoDB, ChromaDB
AI Libraries & APIs: Sentence Transformers, Groq API, TorchVision, pypdf
Cloud & DevOps: Render, Vercel, Hugging Face Spaces, Streamlit Community Cloud, Git, GitHub, CI/CD Basics
Tools: VS Code, Jupyter Notebook, Android Studio, Postman

PROFESSIONAL EXPERIENCE

Software Development Intern — **Zoho Corporation**, Madurai — Jan 2026 – Mar 2026

- Developed and shipped features for the Murugan Pilgrim Guide App and the Medicare App across the full SDLC: requirement analysis, implementation, debugging, testing and release.
- Debugged and resolved defects in production-bound code, following the team's code review and version control practices.

AI & ML Intern — **MarqWon Dynamics**, Remote — May 2026 – Jun 2026

- Built time-series machine learning forecasting models for an agricultural price prediction platform, powering the forecasts shown in the Flutter application.
- Prepared and cleaned historical price data, and evaluated forecast accuracy using standard error metrics.

Machine Learning Intern — **Elysium Technologies Pvt. Ltd.**, Madurai — Feb 2025 – Mar 2025

- Applied machine learning algorithms to a classification and prediction task, covering data preprocessing, feature engineering, model training and evaluation.

PROJECTS

Document Q&A with Citations — RAG System — GitHub | Live Demo

Stack: Python, Streamlit, ChromaDB, Sentence Transformers, Groq API, pypdf, LLMs, Semantic Search

- Built a RAG pipeline with PDF text extraction, overlapping chunking and all-MiniLM-L6-v2 embeddings stored in ChromaDB.
- Generated grounded answers via the Groq API in a Streamlit app with source passages and page-level citations.

AgriPrice Forecasting — Agricultural Price Prediction Platform — GitHub | Live Demo

Stack: Python, FastAPI, Machine Learning, React/Vite, Recharts, Hugging Face Spaces, Vercel

- Built a full-stack platform that forecasts agricultural prices with ML models served through a FastAPI backend.
- Created a Recharts dashboard with CSV upload and data export; deployed on Hugging Face Spaces and Vercel.

FinGuard-AI — AI-Powered Financial Fraud Detection & Risk Analytics Dashboard — GitHub | Live Demo

Stack: Python, Streamlit, Scikit-learn, Pandas, NumPy, Plotly, Anomaly Detection

- Built a Streamlit app using unsupervised ML anomaly detection to flag suspicious transactions from uploaded data.
- Presented risk analytics through interactive Plotly visualizations on a deployed web dashboard.

CT & MRI Image Fusion — Multi-Modal Medical Image Fusion — GitHub | Live Demo

Stack: Python, Deep Learning, Image Processing, Computer Vision

- Built a deep learning system that fuses CT and MRI scans into one composite image for improved medical analysis.
- Applied image processing and computer vision techniques; deployed as an interactive Streamlit web application.

Image Data Augmentation — PyTorch Augmentation App — GitHub | Live Demo

Stack: Python, PyTorch, TorchVision, Streamlit, Pillow

- Implemented 10+ PyTorch/TorchVision augmentations (scaling, cropping, flipping, rotation, affine, color) with combinations.
- Built a Streamlit interface to upload, preview and transform images and download the augmented results.

EDUCATION

B.Tech, Artificial Intelligence & Data Science (Honours) — Ramco Institute of Technology — 2023 – 2027 | CGPA: 8.35/10

HSC — Mary Matha Matric Higher Secondary School, Tamil Nadu — 2022 – 2023 | 79.33%

SSLC — Velammal Matric Higher Secondary School, Tamil Nadu — 2020 – 2021 | 100%

LEADERSHIP

- **Technical Lead (AI & Data Science)** — Smart Irrigation System, a multi-team project; coordinated the AI/data work with the backend and frontend teams.

CERTIFICATIONS

- NPTEL Elite — Big Data Computing; Natural Language Processing | Microsoft — Introduction to Machine Learning
- HackerRank 5-Star — Java, Python, SQL | Udemy — Artificial Intelligence
